AREAS OF EXPERTISE

Technical skills

- *Advanced configuration of Dynamics 365 (Sales, Service, and Field Services): form customization, workflow construction, business rules, dialogues, server-side synchronization, Outlook CRM add-in deployment, etc.)*
- *Analysis, integration, and configuration of Dynamics 365 for Marketing (template creation, forms, pages, surveys, and customer journey configuration).*
- *Proficient in the following languages: ASP .Net, C#, Silverlight, WPF, JavaScript, XML, HTML, CSS, PowerShell, and DAX.*
- *Construction of SQL queries and stored procedures.*
- *Log file analysis.*
- *Implementation and configuration of ADFS.*
- *Mass data integration via SSIS and Azure Data Factory.*
- *Design and creation of analytical reports via SSRS and Power BI.*
- *Advanced analysis and configuration of the Power Platform.*
- *Development of business applications using Power Apps with Dataverse, Dataverse for Teams, SharePoint Online, OneDrive Business, and Business Central.*
- *Implementation of various automated flows using Power Automate.*
- *Development of custom scanning tools using AI Builder.*
- *Integration and configuration of the CoE Starter Kit to monitor the Power Platform (usage tracking and anomaly detection).*
- *Installation and configuration of the standard data synchronization connector between Business Central and Dynamics 365 Sales.*
- *Creation of custom connectors for various needs (commune database, internal ticket management tool, etc.).*

Key skills

- *Scoping and requirements gathering*
- *Participation in pre-sales*
- *Writing detailed functional and technical specifications*
- *Supervision and mentoring of team members*
- *Management of user acceptance testing (UAT), client relationships, and delivery*
- *Leading project meetings and design workshops*
- *Analysis, design, and development around Dynamics 365 and Power Platform solutions*
- *Data migration and integration into Dynamics CRM*
- *Monitoring and performance analysis of the Power Platform*
- *Training sessions and change management support*
- *Coaching, mentoring, and professional development of junior and senior consultants*

PROFESSIONAL EXPERIENCE

Tools / Solutions / Methods

- **Project Management:** MS Project, Gannt Project
- **Methodologies:** Agile Scrum, Sure Step
- **CRM Solutions:** Dynamics CRM 4.0, 2011, 2013, 2015, 2016, and 365 (Sales, Customer Service, and Marketing)
- **Collaboration Tools:** MS SharePoint Online
- **BI Solutions:** Power BI
- **Azure:** Data Factory V1 and V2, Azure Active Directory
- **Business Apps:** Low-code application development with Power Apps (Model-Driven and Canvas)
- **Business Process Automation:** Creation of various flows using Power Automate
- **Governance and Monitoring:** Integration, configuration, and analysis of the Power Platform using the CoE Starter Kit
- **ERP Knowledge:** Business Central (navigation and configuration)

Industry sectors

- Banking
- Insurance
- Real Estate
- Healthcare / Medical
- Public sector
- Transportation

PROFESSIONAL EXPERIENCE

Jan. 2026 - Present

Freelance

Contract : ABC
Portage

Client : **Action Logement Services**

Project : Management of multiple evolution and maintenance projects for the ATLAS Dynamics 365 CRM

Tech environment : Dynamics 365 Customer Service
Dynamics 365 Sales
RabbitMQ
Dataverse
Power BI
Power Automate
Azure (DevOps, MS Entra)
SQL Server
SSIS

Role : **Dynamics 365 Sales and Customer Service Expert**

Responsibilities :

- Implementation of a contact authorization process in the CRM with synchronization to several web applications (Visale, Loca-Pass, etc.) via the RabbitMQ messaging component
- Implementation of a Corporate Space activation system on the Account entity, with multiple configuration options and multi-subsidiary synchronization (up to 7 levels) including a full bulk data migration
- Implementation of a Special Terms and Conditions (CPE) management process for several schemes (PSEEC, PEEC, PEAEC) via a UI fully developed in HTML / JS / CSS, allowing offers and special terms to be configured, administered and duplicated per scheme
- Implementation of several BPF (Business Process Flows) on the Incident table with C# plugin automations for certain steps, and bidirectional synchronization between activities (web forms, appointments and phone calls) via plugins
- Implementation of an incident qualification system via a custom PCF control, supporting up to 8 levels of qualification / sub-qualification and multiple display rules
- Implementation of multiple Power Automate flows to create "Web Form" activities in the CRM following form submissions on the Action Logement website
- Development of several SSIS packages for bulk data migration for the Corporate Space and CPE modules, as well as an SSIS package for data anonymization and archiving in line with GDPR requirements
- Correction of multiple SSIS packages as part of the corrective and evolutive maintenance of the ATLAS CRM
- Implementation of a Power BI report to monitor SSIS interfaces
- Contribution to corrective fixes and evolutions of the Atlas CRM (configuration, JavaScript, plugins, Azure Functions, Power Automate, authorization)

PROFESSIONAL EXPERIENCE

Jun 2025 - Dec. 2025

Freelance

Contract : **PORTIFY**

Client : **Groupe ADP (Aéroport De Paris)**

Project : Implementation of a Customer Voice CoE enabling the centralization of survey data and survey responses from approximately 50 different environments into a single, dedicated for tracking and monitoring.

Tech environment :
Power Platform
Power BI
Dataverse
Dynamics 365 Customer Voice
SharePoint Online
Azure

Role : **Dynamics 365 Customer Voice and Power Platform expert**

Responsibilities :

- Audit of existing Customer Voice and Power Platform environments
- Design an architecture aligned with business requirements
- Development of a complex dataflow to transform data
- Creation and configuration of a SharePoint Online site and his associated lists to plug to multiple developed canvas app
- Creation of multiple canvas apps (License request, Access request, survey archiving request form, ...)
- Creation of a Power BI report to audit and monitor
- Creation of a Model Driven app for survey data administration

Nov. 2023 – Jun. 2025

Freelance

Contract : **PORTIFY**

Client : **AstraZeneca**

Project : Technical Lead for Power Platform within the AstraZeneca France delivery team

Tech environment :
Power Platform
Power BI
Dataverse
SharePoint Online
OneDrive Enterprise
Azure
Amazon Redshift
PostgreSQL

Role : **Technical Lead Power Platform**

Responsibilities :

- Audit of existing Power Apps solutions
- Needs analysis and scoping
- Planning and facilitating design workshops
- Development of multiple Power Apps applications (partnership management, contract management, ticketing, etc.)
- Development of Power BI reports to track partnerships and data transparency, aggregating sources (SAP, Redshift, SharePoint, etc.) into a unified dashboard ("Vision 365") for compliance
- Writing functional and technical documentation

PROFESSIONAL EXPERIENCE

Jul. 2022 - Oct. 2023

Permanent

Employer : **DXC
Technology**

Client : **PersoPoint**

Project : Design and implementation of a Power BI architecture aligned with internal IS and development of multiple reports

Tech environment : Oracle Database
PeopleSoft
Azure
Power Platform
Power BI
SharePoint Online

Role : **Managing Architect & Power BI Technical Lead**

Responsibilities :

- Needs analysis and scoping
- POC design and presentation on an internal use case
- Project tracking and oversight (leading 2 team members)
- Implementation of the Power BI architecture
- Design and development of Power BI reports (technical, HR, etc.)
- Training key users and administrators on report usage
- Technical lead for application maintenance and evolution

Apr. 2022 - Nov. 2022

Permanent

Employer : **DXC
Technology**

Client : **Soletanche Bachy (Vinci Group)**

Project : Implementation of digital forms for various authorization requests

Tech environment : Power Platform
Power Apps
Power Automate
Azure
Dataverse
SharePoint Online

Role : **Technical Lead & Power Platform Reference**

Responsibilities :

- Needs analysis and scoping
- Technical oversight and guidance (leading 2 team members)
- Participation in project committees
- Architecture implementation of the Power Platform
- Development of digital forms using Model-Driven Power Apps and automated processes with Power Automate (approval requests, PDF conversions, etc.)
- Supervision and contribution to technical specifications and architecture documentation

PROFESSIONAL EXPERIENCE

Aug. 2021 - Mar. 2022

Permanent

Employer : **Groupe Calliope**

Client : **Maison Pierre**

Project : Deployment of multiple Power Apps applications for managing sales catalogs and CRM price books. Oversight of the ongoing maintenance and evolution of these applications and the CRM

Tech environment : Dynamics 365 Sales
Power Platform
Power Apps
Power Automate

Role : **Power Platform Architect and Technical Lead**

Responsibilities :

- Requirements analysis and project scoping
- Project coordination (supervising 2 junior resources)
- Contribution to design and development of Power Apps applications (sales catalogs management and price book management)
- Drafting of technical and functional specifications, and training materials
- Training for key users and administrators
- Responsibility for the functional and technical maintenance of the applications

Jul. 2021 - Aug. 2021

Permanent

Employer : **Groupe Calliope**

Client : **Maison Pierre**

Project : Development of an app to OCR PDF soil studies, store documents in SharePoint, create records in CRM, and map studies using Power Platform and AI Builder

Tech environment : Dynamics 365 Sales
Power Platform
Power Apps
Power Automate
AI Builder
SharePoint Online

Role : **Power Platform Functional - Technical Architect**

Responsibilities :

- Needs analysis and scoping
- Project coordination
- Participation in the design and development of Power Apps (file upload to CRM and mapping)
- Writing user guides for the applications
- Training for key users

PROFESSIONAL EXPERIENCE

Jun. 2021 - Aug. 2021

Permanent

Employer : **Groupe Calliope**

Client : **Groupe Calliope**

Project : Development of an application to input Business Central ERP articles into the CRM (Quote entity) via Power Apps

Tech environment :
Dynamics 365 Sales
Power Platform
Power Apps
Power Automate
Business Central

Role : **Power Platform Functional - Technical Architect**

Responsibilities :

- Needs analysis and scoping
- Task coordination on Power Platform and Power Apps (supervising one junior resource)
- Setup of a Canvas application
- Configuration and setup of the connector between Business Central and Dynamics CRM
- Writing user documentation
- Application presentation to the entire group
- Maintenance and evolution responsibility

Apr. 2021 - Jun. 2021

Permanent

Employer : **Groupe Calliope**

Client : **Groupe Calliope**

Project : Development of a Power Apps application for input and management of employee activity reports

Tech environment :
Power Platform
Power Apps
Power Automate
Power BI
Business Central

Role : **Power Platform Functional - Technical Architect**

Responsibilities :

- Requirements analysis and scoping
- Task coordination (with one confirmed resource)
- Setup of both Model-Driven and Canvas Power Apps
- Creation of an activity tracking dashboard for managers using Power BI
- Setup and configuration of the connector between Business Central and the Model-Driven App
- Group-wide application presentation
- Ongoing maintenance and enhancement management

PROFESSIONAL EXPERIENCE

Mar. 2020 - Feb. 2021

Permanent
